

Digital Edge & P.S. 5 Become Recycling Rangers

Staten Island, NY- June 24, 2010-Danielle Wagoner from Digital Edge along with two volunteer sophomores from Tottenville high school visit the students and staff of P. S. 5 Huguenot School to bring awareness and excitement about the Recycling Rangers Project. The program requires the collection of unwanted, used or broken electronics to teach the students the importance of recycling. All donations are mailed to Gazelle: a website that purchases electronics dependent on its quality and current condition and/or properly recycles items if they do not have market value. All proceeds for this fundraiser will go to the beautification of P.S. 5 school grounds to enhance the school facility and community's environment.

During an end-of-year assembly, students were handed flyers and informed on how to start collecting for the fundraiser over summer break. To enhance student activity, Digital Edge announced a contest between classes; the class with the most devices raised wins a pizza/ice cream party following the completion of the fundraiser. Filled with excitement, students expressed their interest to start collecting as soon as possible.

In addition to having students participate within their local community, Digital Edge has aligned with The New York Public Library office in Staten Island, located on Huguenot Avenue, Huguenot Pharmacy and The Staten Island Skating Pavilion, creating drop off locations. These local businesses are holding boxes for people to donate their old/used devices to this cause. Donations will also be accepted at P.S. 5 when school resumes in September through the projects completion on October 8, 2010. Electronics collected consist of cell phones, chargers, digital cameras, video games, laptops, desktops, and PDA's. Please go to www.Gazelle.com for a complete list of gadgets you can turn in.

We at Digital Edge are enthusiastic about working together with P.S. 5 and appreciate all the support from participating businesses in the area.
