

# Digital Edge

## **Compliance: ISO 27001**

---

Digital Edge provides a 360-degree approach to achieving ISO 27001 certification. Digital Edge aligns with your key stakeholders internally to identify the gaps and implement the standard policies and procedures that will govern data classification within your organization. We provide the specific technologies as well as implement the controls that satisfy ISO certification for AWS and Azure Public Cloud environments. Our team of subject matter experts will guide you through the step-by-step process, delivering a successful result both cost-effectively and in the most efficient manner possible.

Implementing ISO 27001 not only resolves such situations but also encourages fast-growing companies to formalize and develop their core processes, even those unrelated to security. With Digital Edge, you'll mitigate lost time and preserve critical organizational knowledge that might otherwise dissipate with employee turnover.

You'll benefit from having a dedicated in-house cyber lawyer overseeing the plan at Digital Edge. This ensures smooth communication between internal and external compliance teams, enhancing the efficiency of the certification process. Additionally, our ISO certified auditor provides comprehensive knowledge of audit reinforcement details, guiding you through potential non-conformity findings and giving us a distinct advantage over other firms. Rest assured, we guarantee successful completion and certification by closely adhering to our process and guidance.
