

Digital Edge

Compliance: NIST 800- 171

Digital Edge, a cybersecurity and compliance company, offers tailored solutions to assist organizations in achieving NIST 800-171 compliance effectively. Leveraging its cybersecurity frameworks and regulations expertise, Digital Edge provides comprehensive guidance throughout the compliance process. They develop and implement customized strategies and controls to align with NIST 800-171 requirements, ensuring the protection of Controlled Unclassified Information (CUI). Digital Edge also offers ongoing monitoring and support to maintain compliance and adapt to evolving cybersecurity threats and regulations. With their proactive approach and dedication to excellence, Digital Edge is a trusted partner for organizations seeking to bolster their cybersecurity posture and meet NIST 800-171 standards. agencies.

NIST 800-171 compliance refers to adherence to the security requirements outlined in NIST Special Publication 800-171, which is designed to protect Controlled Unclassified Information (CUI) in non-federal systems and organizations. These requirements aim to safeguard sensitive information when it's processed, stored, or transmitted by contractors and subcontractors of federal agencies. Compliance with NIST 800-171 involves implementing specific security controls and practices to ensure the confidentiality, integrity, and availability of CUI. It's particularly important for organizations involved in government contracts or partnerships to demonstrate compliance with these standards to safeguard sensitive data and maintain trust with federal agencies.

NIST 800-171 focuses specifically on protecting Controlled Unclassified Information (CUI) in non-federal systems, its principles are complementary to the overarching cybersecurity practices recommended by the NIST CSF.
