

ISO 27001 Compliance For Public Clouds

Digital Edge provides a 360 degree approach to achieving ISO 27001 certification. Digital Edge aligns with your key stakeholders internally to identify the gaps and implement the standards, policies and procedures that will govern data classification within your organization We provide the specific technologies as well as implement the controls that satisfy ISO certification for AWS and Azure Public Cloud environments. Our team of subject matter experts will guide you through the step by step process delivering a successful result both cost-effectively and in the most efficient manner possible.

Why Digital Edge?

STEP BY STEP PLAN

Typically fast-growing companies don't have the time to stop and define their processes and procedures - as a consequence, employee's often do not know what needs to be done, when, and by whom. Implementation of ISO 27001 helps resolve such situations, because it encourages fast growing companies to formalize and develop their main processes (even those that are not security related). Digital Edge will help you reduce lost time and maintain critical organizational knowledge that could otherwise be lost when people leave the organization.

IN-HOUSE LEGAL STAFF

In retrieving ISO 27001 certification you will have a dedicated in- house cyberlawyer overseeing the plan and facilitating communication between internal and external compliance teams. We guarantee successful completion and certification by adhering to our process and closely following our directions.

RESPONSIVE AND COST EFFECTIVE

Digital Edge develops the policies and procedures by approaching compliance as a collaborative process. We assist with gap analysis, building ISO ISMS, establishing governance over corporate information technology and managed data. In the public clouds we assist with automation and enforcement of the frameworks for optimal security and data privacy. We provide same day responses to questions and a high degree of flexibility with our scheduling. We also help provide customers with the technological solutions that are narrowly tailored to their policies, procedures and architecture for enhanced monitoring for future certifications and audits. Last but not least we are able to deliver our services at a lower cost than our competitors.

ISO 27001 AUDITOR ON STAFF

Digital Edge has an ISO certified auditor who is educated on all of the details that will be reinforced during the audit process, this person can provide the proper guidance on all of the key elements that may be deemed as non-conformity findings, this is an edge over other firms that do not have an in-house auditors educated on what a certifying body will be looking for.
