

SOC 2 Compliance For Public Clouds

Digital Edge provides a 360 degree approach to achieving SOC 2 certification. We align with your key stakeholders internally to identify the gaps and implement the standards, policies and procedures that will govern data classification within your organization. We provide the specific technologies within AWS and Azure - Public Cloud environments for optimal security and data privacy. Our team of subject matter experts will guide you through the step by step process delivering a successful result both cost-effectively and in the most efficient manner possible.

WHY DIGITAL EDGE?

SOC 2, is a voluntary compliance standard for service organizations, developed by the American Institute of CPAs (AICPA), which specifies how organizations should manage customer data. The standard is based on the following Trust Services Criteria: **security, availability, processing integrity, confidentiality, privacy.**

Digital Edge identifies the gap and implements the standard, policies and procedures that will govern data classification within your organization for SOC 2 certification. Our unique approach allows us to establish the standard to be naturally integrated into your environments without extra work or conflicts. We have an in-house staff of legal and auditing experts that will facilitate communication between internal and external compliance teams.

A SOC 2 report is tailored to the unique needs of each organization. Depending on your specific business practices, each organization can design controls that follow one or more principles of trust. These internal reports provide organization for your regulators, business partners, and suppliers, with important information about how your organize your data.

Technology Solutions in the Cloud

With a plethora of tools available for AWS/Azure customers Digital Edge makes it easy by providing you with the specific technological solutions that are narrowly tailored to the standard, policies, procedures and architecture unique to your company's infrastructure. We plan for the long term, assuring enhanced monitoring for future certifications and audits.

Security Assurance

Optimize Technology

Automation in the Cloud

Digital Edge can automate seamlessly the SOC 2 requirements for our clients. With enhanced automation capabilities, we can guide, implement and manage what used to be a manual compliance process for our clients using the most efficient automation tools that AWS/Azure have to offer. These tools enable cybersecurity and privacy controls, processes and artifact collection.

Digital Edge - Proprietary SaaS Cyber Regulator tool

Our own proprietary SaaS GRC software product that makes preparation, audit, and maintenance seamless while also being user friendly. The Cyber Regulator tool is a platform that helps our clients with SOC 2 as well as all other cyber compliance frameworks through data organization, controls, risks, mitigates, and more. This tool supports efforts for ongoing monitoring and compliance improvement
