Advanced Datacenter Management

About Us

As a highly-specialized technology organization, Digital Edge concentrates on supporting back-end technology services; assisting companies with integrations of core business needs.

The Objective: To create seamless data center environments, tailoring all necessary and independent requirements from ideals to realities while providing best-in-class technical knowledge for future preparations.

Founded in 1996, corporate demand required the foundation of the company to be fully furnished with ONLY highly suited technologists. Since inception, this corporate requirement became a localized branding code for success, turning Digital Edge into a technology powerhouse. Building the groundwork, the company developed large research & development labs to explore and expand the company's breadth of knowledge and exposure to enhance their technology abilities across all IT arenas.

Tolerance: Technology should not have a tolerance other than ZERO. Failure lies on the premise of faulty architectural designs or support processes; therefore Digital Edge maintains an ever-changing database of analytical information to guarantee to be tolerance free.

Hosted Services

☐ Consultations & Provisioning
☐ Upfront Security, Intrusion Detection / Prevention / Load Managing /Balancing
☐ Point-to-Point Connectivity
☐ DNS, DHCP, Remote Access
☐ Clustering, Monitoring, & Synchronization

Private Cloud Services

☐ Virtualized Environment Build-outs
☐ Virtual Infrastructure Management
☐ Quality Internal Infrastructure Assessments
☐ Private Clouds
☐ Public Cloud Offerings

H.A. Planning & Implementation

☐ Consultation, Blueprinting, Proprietary Designs
☐ Failover Scenarios & Planning /Testing
☐ Technology & Vendors Selection

Enterprise Storage

☐ I/O Requirements Consultation & Analysis
☐ RAID Configuration
☐ Storage & Software Migrations
☐ Scale-outs & Consolidations

Monitoring Services

☐ Inside & Outside Security perimeters
☐ 20 minute response time
☐ Custom escalation procedures
☐ Environmental learning
☐ Full troubleshooting & remediation
☐ Performance portal

Backup & Recovery Services

☐ Disk-to-Disk-to-Tape Backup
☐ Full / Differential / Incremental Backups
☐ 24/7 DBA Expertise Available
☐ Change Management, Source Control
☐ Data Manipulation & Monitoring
☐ Real Time Performance Graphs

Programming Services

☐ Small Scale Extension /Troubleshooting
☐ Agile Project Style & Management
☐ System Integration
☐ Customized System Builds

Managed Security

☐ Proxy, Access Zones, and Perimeters Planning &Establishment
☐ Advanced Filtering & Firewalling
☐ NAT / PAT / VPN Management
☐ Vendor Access Management
☐ Patching, Tunneling & Encryptions
